Staff Operations & Navigation Manual

Essential reference guide for Front-of-House (Captains, Cashiers, Servers), Kitchen (Chefs, Line Cooks), and Store Managers explaining which screen manages what and how everyday workflows are performed.

Quick Service Rules for All Staff:
• **Store Availability**: Toggle Open vs Paused using the status pill in the top header (15m rush pause, 30m meal break, or resume).
• **Orders & POS**: Has 2 tabs — *Punch Bill* for taking counter/table orders and *Live Orders Pipeline* to accept online/QR orders.
• **Kitchen Tickets (KOT)**: Routed to KDS tablets & 80mm printers with automatic Starters > Mains > Desserts Hold & Fire sequencing.
• **Manager Overrides**: Bill voids, discounts over ■200, inventory write-offs, and payment refunds require Manager PIN (Default: **2222**).

1. Fast Lookup: Which Page Helps in What?

What You Want to Do	Page / Screen	Who Uses It	What Can Be Managed Here
Punch new orders, select tables, add modifiers, take payments	**Orders & POS** (Punch Bill)	**Cashier, Captain**	Fast touch menu grid, cart, table selector, discounts, split payment (Cash/UPI/Card), print bill.
Accept new QR / Zomato / Swiggy orders, track cooking, mark ready	**Orders & POS** (Live Pipeline)	**Cashier, Supervisor**	1-click *Accept Order*, *Mark Ready*, *Settle Bill*, reprint KOT chits, elapsed cooking timer.
Pause online ordering, staff lunch break, kitchen rush hold	**Top Header** (Store Status Pill)	**Manager, Cashier**	Toggle *Open* vs *Paused*, 15m rush pause, 30m break, 1hr restock, toggle QR table ordering.
Cook food in kitchen, view course timers, fire courses	**Kitchen Display (KDS)**	**Head Chef, Line Cooks**	Digital KDS chits by station (Kitchen, Tandoor, Bar), course Hold/Fire, audio chimes, station metrics.
View dining tables, transfer guest tables, generate QR codes	**Tables & QR Codes**	**Host, Captain, Server**	Visual floor map, occupancy status (Vacant, Running, Billed), 1-tap table transfer, print table QRs.
Table-side ordering on mobile/tablet, seat tags, call assistance	**Waiter Companion**	**Waiter, Captain**	Mobile handheld order taking, seat allocation (Seat 1, Seat 2), progressive course firing, guest call chimes.
Takeaway counter tokens, delivery rider assignment & OTPs	**Dispatch & Riders**	**Packing Staff, Rider Host**	Takeaway token call numbers, Zomato/Swiggy direct fleet handover, rider assignment, delivery status.
Table reservations, advance bookings, walk-in waitlist queue	**Bookings & Queue**	**Hostess, Manager**	Advance booking calendar, party size allocation, live walk-in waitlist with WhatsApp table-ready pings.
Shift opening float, petty cash expenses, cash drawer balance	**Cash Drawer**	**Cashier, Manager**	Morning cash float, mid-day petty expenses, cash sales audit, physical count reconciliation, Z-Report.
Edit dish prices, mark items sold-out (86), add modifiers	**Menu & Pricing**	**Manager, Owner**	Dish pricing, tax slabs, category order, 1-click in-stock/sold-out toggle across POS & QR menus.
Track ingredient stock, Purchase Orders, wastage & loss logs	**Inventory & Recipes**	**Storekeeper, Chef**	Raw ingredient levels, auto BOM deduction on billing, vendor PO inwarding, wastage log with PIN.
Customer CRM, loyalty tiers, WhatsApp campaigns & Google Reviews	**Customers & CRM**	**Manager, Marketer**	RFM guest segments (Champions, Loyal, At-Risk, Dormant), ■0 WhatsApp broadcasts, NPS review routing.
Sales reports, hourly heatmap, staff leaderboard, GSTR-1, Z-Report	**Reports & Analytics**	**Owner, Accountant**	Turnover, category margins, staff sales stats, GSTR-1 SAC 996331/996332 export, 80mm Z-Report print.
Multi-outlet network, central menu overrides, stock transfers	**Multi-Outlet HQ**	**Franchise Owner, Area Head**	Multi-store dashboard, Inter-Store Transfers (IST), outlet price overrides, brand royalty reports.
Weighing scales, barcode scanners, thermal receipt printers	**Hardware Peripherals**	**Technician, Manager**	RS-232 serial scale (gram-to-price), ESC/POS 58/80mm raw thermal printers, customer pole displays.
Outlet branding, concept presets, WhatsApp OpenWA gateway config	**Settings**	**Owner, Administrator**	Concept presets (Café, QSR, Dining), OpenWA WhatsApp URL & API Key, billing feature flags.

2. Step-by-Step Staff Workflows

A. How to Open the Store & Manage Peak Rush Pauses

1. Look at the top right header pill showing **Store: Open** (green) or **Store: Paused** (amber).
2. Click the pill to open the **Store Ordering Status** control window.
3. When the kitchen is overloaded or taking a staff break, click **15 Mins (Kitchen Rush)** or **30 Mins (Staff Break)**. Inbound online & QR orders pause automatically while active dining room billing continues without interruption.
4. When ready to take orders again, click **Resume Store Now**. A global banner will confirm ordering is live.

B. How to Take an Order & Generate a Bill (Staff POS)

1. Open **Orders & POS** on the left sidebar. Ensure top mode is set to **Punch Bill (New Order)**.
2. Choose Order Type: **Dine-In** (select dining table), **Takeaway**, or **Delivery**.
3. Click menu items to add to the cart. If an item has variations (Regular/Large) or addons, the option dialog prompts automatically.
4. **Kitchen Ticket (KOT)**: Click *Print KOT* to send items to the kitchen display and thermal chit printer.
5. **Payment Settlement**: Click *Pay / Checkout*. Choose tender: **Cash**, **UPI QR**, **Card**, or **Split Payment**.
6. Enter the guest's mobile number. RestroPlus automatically dispatches a zero-cost digital tax invoice via WhatsApp.
7. Confirm payment. The receipt prints, the table is cleared, and customer loyalty points are added automatically.

C. How to Accept & Process Online & QR Orders (Live Pipeline)

1. When a table QR self-order or online delivery order arrives, you will hear a **cheerful chime** and see a bottom-right alert toast.
2. Click **Accept Order** on the toast, or switch to **Orders & POS > Live Orders Pipeline**.
3. Follow the 4 visual pipeline stages:
   - ■ **Inbound / Pending (Blue)**: Click *Accept Order* to confirm and send items to the kitchen.
   - ■ **Kitchen Cooking (Amber)**: Food is being cooked. Color changes to red if delayed past 25 minutes.
   - ■ **Ready (Green)**: Food plated at pass. Click *Mark Served* (dine-in) or *Handover & Close* (takeaway).
   - ■ **Settle Bill**: Collect cash/UPI and complete transaction with 1 click.

D. How Kitchen Staff Uses the Kitchen Display System (KDS)

1. On kitchen tablets/monitors, open **Kitchen Display** from the sidebar.
2. Station line cooks can filter by their station: **Kitchen / Hot Line**, **Tandoor**, **Bar**, or **Dessert**.
3. **Course Sequencing (Hold & Fire)**: Appetizers appear Active immediately. Mains and Desserts show on Hold until Captains fire them.
4. When dishes are cooked and plated, tap **Mark Ready**. The front counter receives an instant alert.

E. How Captains Use the Handheld Waiter Companion

1. Open **Waiter Companion** on mobile phones or handheld POS terminals.
2. Tap an occupied table to view running orders, or tap a vacant table to seat guests and start taking orders.
3. Tag items by **Seat Number (Seat 1, Seat 2)** so food runners know exactly who gets what.
4. If a guest presses the digital call bell on their table QR, an assistance notification sounds on the Waiter Companion with table number and request type (Water, Bill, Captain). Tap *Acknowledge* and resolve it.

F. How to Open & Balance the Cash Register (Shift Balancing)

1. **Shift Opening**: Go to **Cash Drawer**. Record the opening cash float (e.g. ■2,000 for change).
2. **Petty Expenses**: Record any mid-day petty cash payouts (e.g. ■150 for emergency milk) with mandatory reason.
3. **Shift End Close**: Count physical currency in the cash drawer. Enter note breakdown.
4. System computes: Expected Cash = Opening Float + Cash Sales - Petty Expenses. Any discrepancy is logged in the audit trail.
5. Print the **End-of-Day (EOD) Z-Report** on the 80mm thermal receipt printer for management sign-off.

3. Back-Office, Inventory & Customer CRM Guide

A. Recipe Costing, Auto-Deductions & Purchase Orders (Inventory)

- **Live Stock Levels**: View real-time raw ingredient quantities under **Inventory & Recipes**. Ingredients below safety threshold appear in amber.
- **Automatic Recipe Deductions (BOM)**: Every dish billed deducts exact recipe quantities (e.g. Butter Chicken deducts 200g Chicken, 30g Butter, 50ml Cream) automatically.
- **Purchase Orders (Procurement)**: Create POs for suppliers under the *Procurement* tab. Click *Receive & Inward* to update inventory with 1 click.
- **Wastage & Spoilage**: Enter damaged or expired stock under the *Wastage* tab. Requires Manager PIN authorization to prevent stock leakage.

B. Customer CRM, Loyalty & Smart Review Hub (Reelo Parity)

- **RFM Segments**: Diners are classified automatically under **Customers & CRM** into *Champions*, *Loyal*, *At-Risk*, *Dormant*, and *New* based on visit recency and spending.
- **Zero-Cost WhatsApp Campaigns**: Under the *Campaigns* tab, create broadcast promotions using template tags ({{name}}, {{points}}, {{discount}}). Sends via your self-hosted OpenWA gateway at ■0 cost.
- **Smart Review Routing & Google Reviews**: Under the *Feedback & NPS* tab:
  - **4 & 5 Stars (Promoters)**: Routed directly to your Google Maps listing to boost your public rating.
  - **1 & 2 Stars (Detractors)**: Public link is hidden, and an immediate manager alert is created for rapid recovery.
- **Automated Birthday & Win-Back Journeys**: Automated daily triggers under the *Automations* tab send birthday perks and 30-day dormant vouchers automatically.

C. Statutory Indian Tax Reports & GSTR-1 Ledger

- Go to **Reports & Analytics** to view hourly sales heatmaps, category gross margins, and staff productivity leaderboards.
- **GSTR-1 Portal Export**: Revenue is classified into **SAC 996331** (Dine-in: 2.5% CGST + 2.5% SGST) and **SAC 996332** (Takeaway/Delivery: 5% GST). Click *Export GSTR-1 JSON* or *CSV* for direct upload to the GST portal.

D. Multi-Outlet HQ & Inter-Store Transfers (IST)

- Go to **Multi-Outlet HQ** to manage branch networks, central menus, and outlet price overrides (e.g. Airport branch +15%).
- Requisition and transfer raw ingredients between outlets with automated dispatch tracking and inwarding verification.

4. Staff Roles & Manager Security PINs

Staff Role	Default User	PIN	Operational Permissions & Responsibilities
Store Owner	Rajesh Sharma	**1111**	Full unrestricted system control, multi-outlet management, financial audits, settings.
Restaurant Manager	Pooja Nair	**2222**	Floor management, bill void overrides, discounts > ■200, stock write-off authorization.
Head Cashier	Sunil Verma	**3333**	POS register billing, split payment collection, cash drawer float & shift closing reconciliations.
Floor Captain / Waiter	Arun Kumar	**4444**	Table-side ordering, seat allocation, course hold/fire, guest call assistance resolution.
Head Chef / Kitchen	Chef Manpreet	**5555**	Kitchen Display System (KDS), course preparation timing, ticket completion chimes.
Inventory Storekeeper	Deepak Soni	**6666**	Raw ingredient inwarding, vendor Purchase Orders, digital weighing scale calibrations.

Need Hardware or Technical Assistance?
- **Thermal Printers & Scales**: Go to *Hardware Peripherals* to test ESC/POS byte streaming or scale serial ports.
- **WhatsApp Gateway Status**: Check OpenWA server at http://192.168.1.9:2785. Status is verified in *Settings*.
- **Offline Billing**: If the internet drops, RestroPlus continues billing without disruption and auto-syncs when online.
